

Clinical Technologist for Molecular Diagnostics

Access Genetics, a leading innovator in molecular diagnostics and telemedicine, is seeking to expand its clinical laboratory team to accommodate continued growth of our CAP-accredited and CLIA-certified national molecular genetic laboratory. Full-time positions are open within our molecular and cytogenetics areas, with Medical Technologists or Cytogenetic Technologists desired for these positions.

Duties:

Responsibilities include performance of diagnostic molecular and/or FISH assays per established protocols, result interpretation and reporting, initial troubleshooting analysis, maintenance of lab equipment and records, review of procedures/protocols, and performance of QA/QC activities.

Qualifications:

Preferred candidates will have the following qualifications:

- Bachelor of Science in Medical Technology or Bachelor's degree in life science with certification as a Cytogenetic technologist.
- Active ASCP certification and molecular experience are preferred.
- Must be able to work with minimal supervision and meet established turn-around times for clinical testing.
- Effective and articulate communicator with the ability to work well with others and provide excellent customer service to internal and external customers.
- Effective time-management/organizational skills and strong documentation skills are required.

Access Genetics offers a competitive salary and benefits package. A background check is required as a condition of employment. To be considered for this opportunity, please respond with resume including salary history and salary range expectations to:
